

Lift Zones in Southern Arizona

As part of our ongoing commitment to help connect low-income families to the internet, Comcast is equipping multiple locations across Southern Arizona with WiFi-connected “Lift Zones” before the end of 2021. Working with our network of nonprofit, community, and city partners, Comcast is providing robust WiFi in safe spaces for students and adults to get online, participate in workforce development trainings, and access critical resources.

The **COVID-19 crisis** has put many low-income students and families at risk of being left behind and has accelerated the need for comprehensive digital equity and Internet adoption programs to support them. Lift Zones will be located across Southern Arizona in Comcast’s service area.

This initiative will provide **free hotspot connectivity**, and access to hundreds of hours of educational and digital skills content. Lift Zones complement Comcast’s Internet Essentials program, which, since 2011, has helped connect more than 10 million low-income people to the Internet at home, including more than 11,600 low-income people in Southern Arizona.
